

Welcome to Snag Links!

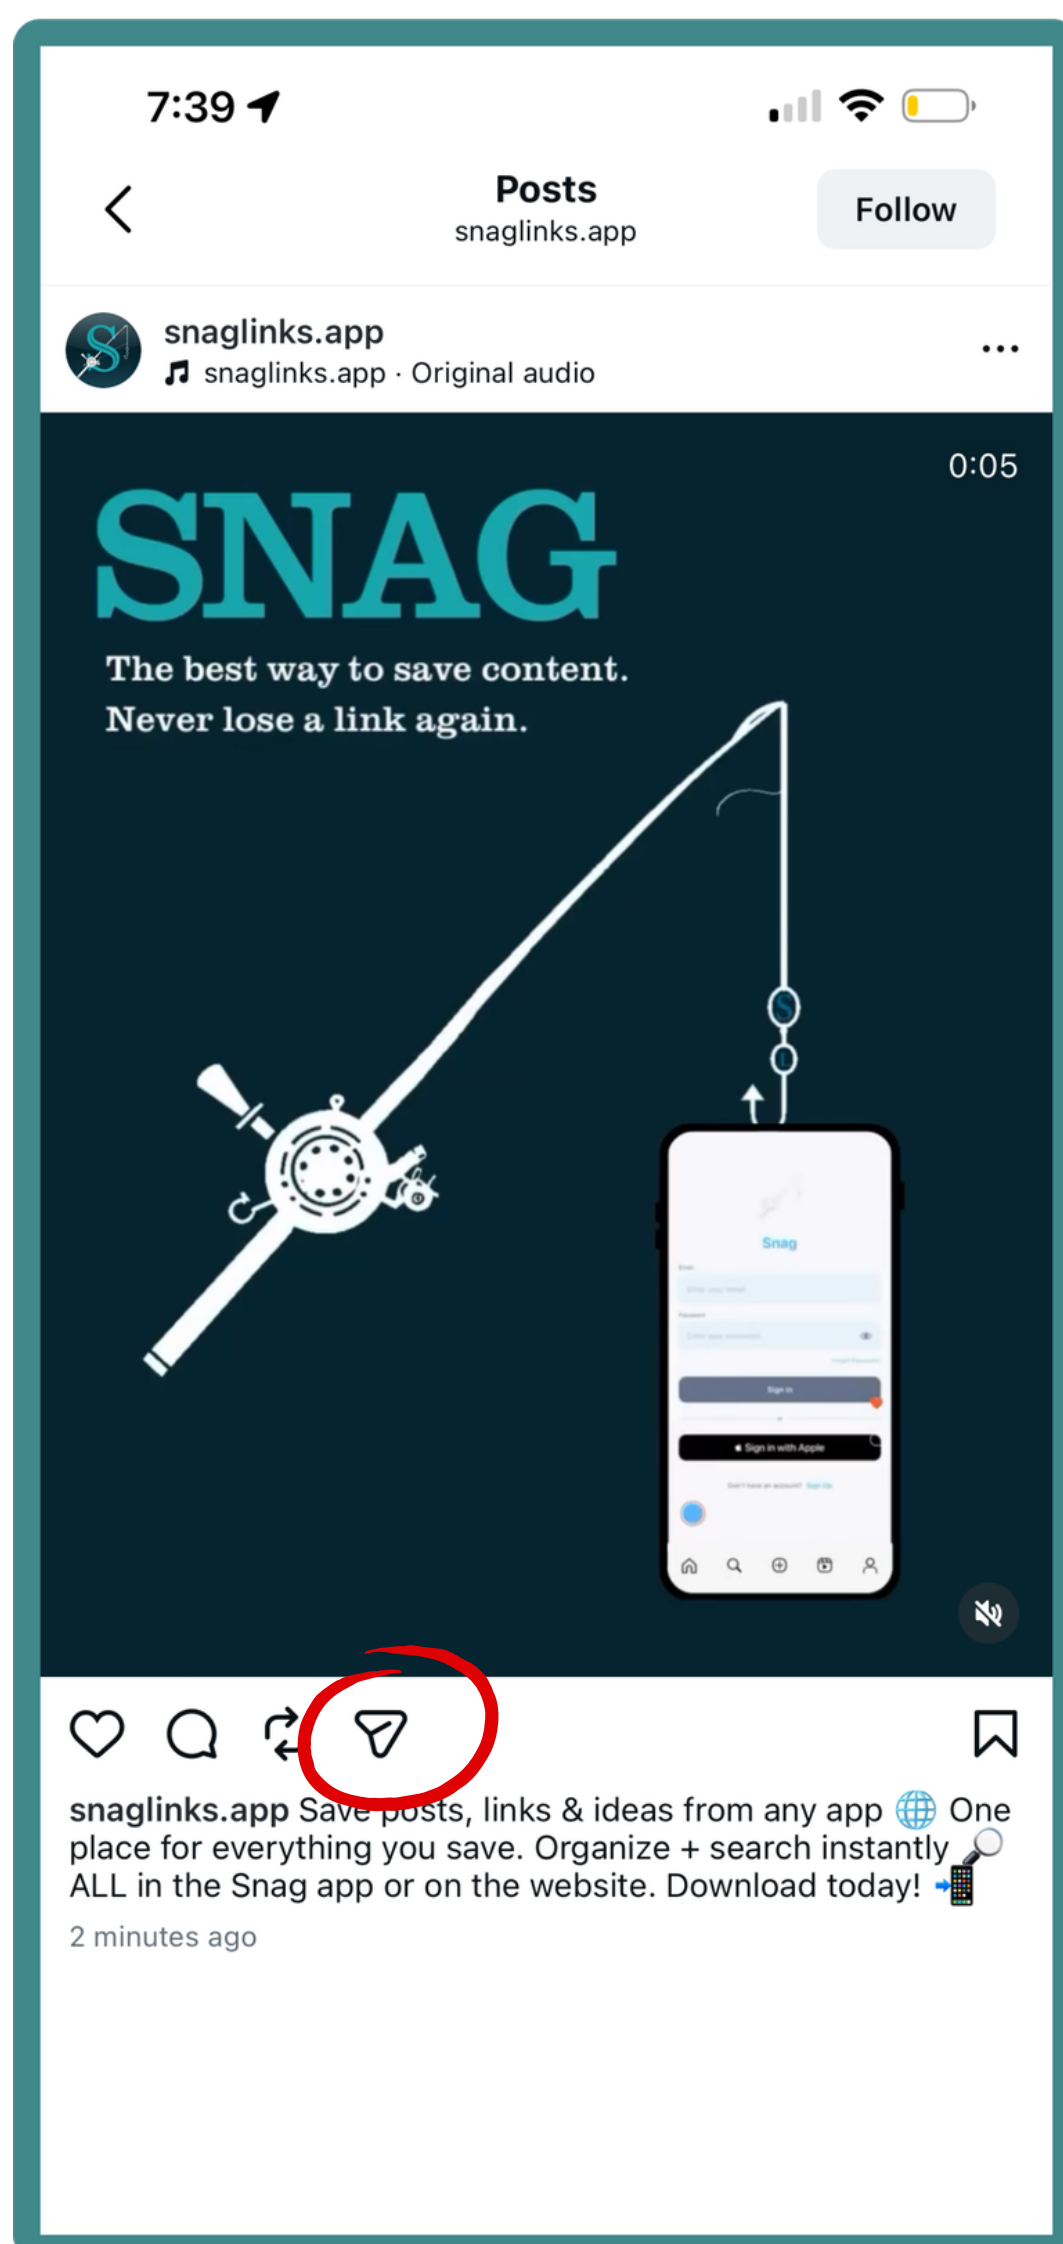

Below is a full tutorial on how to start saving links and content to our app.

Step 1: Go to any website or platform you would like to save content from. Below are examples from Instagram, TikTok, and the web. Most other sites have similar share features.

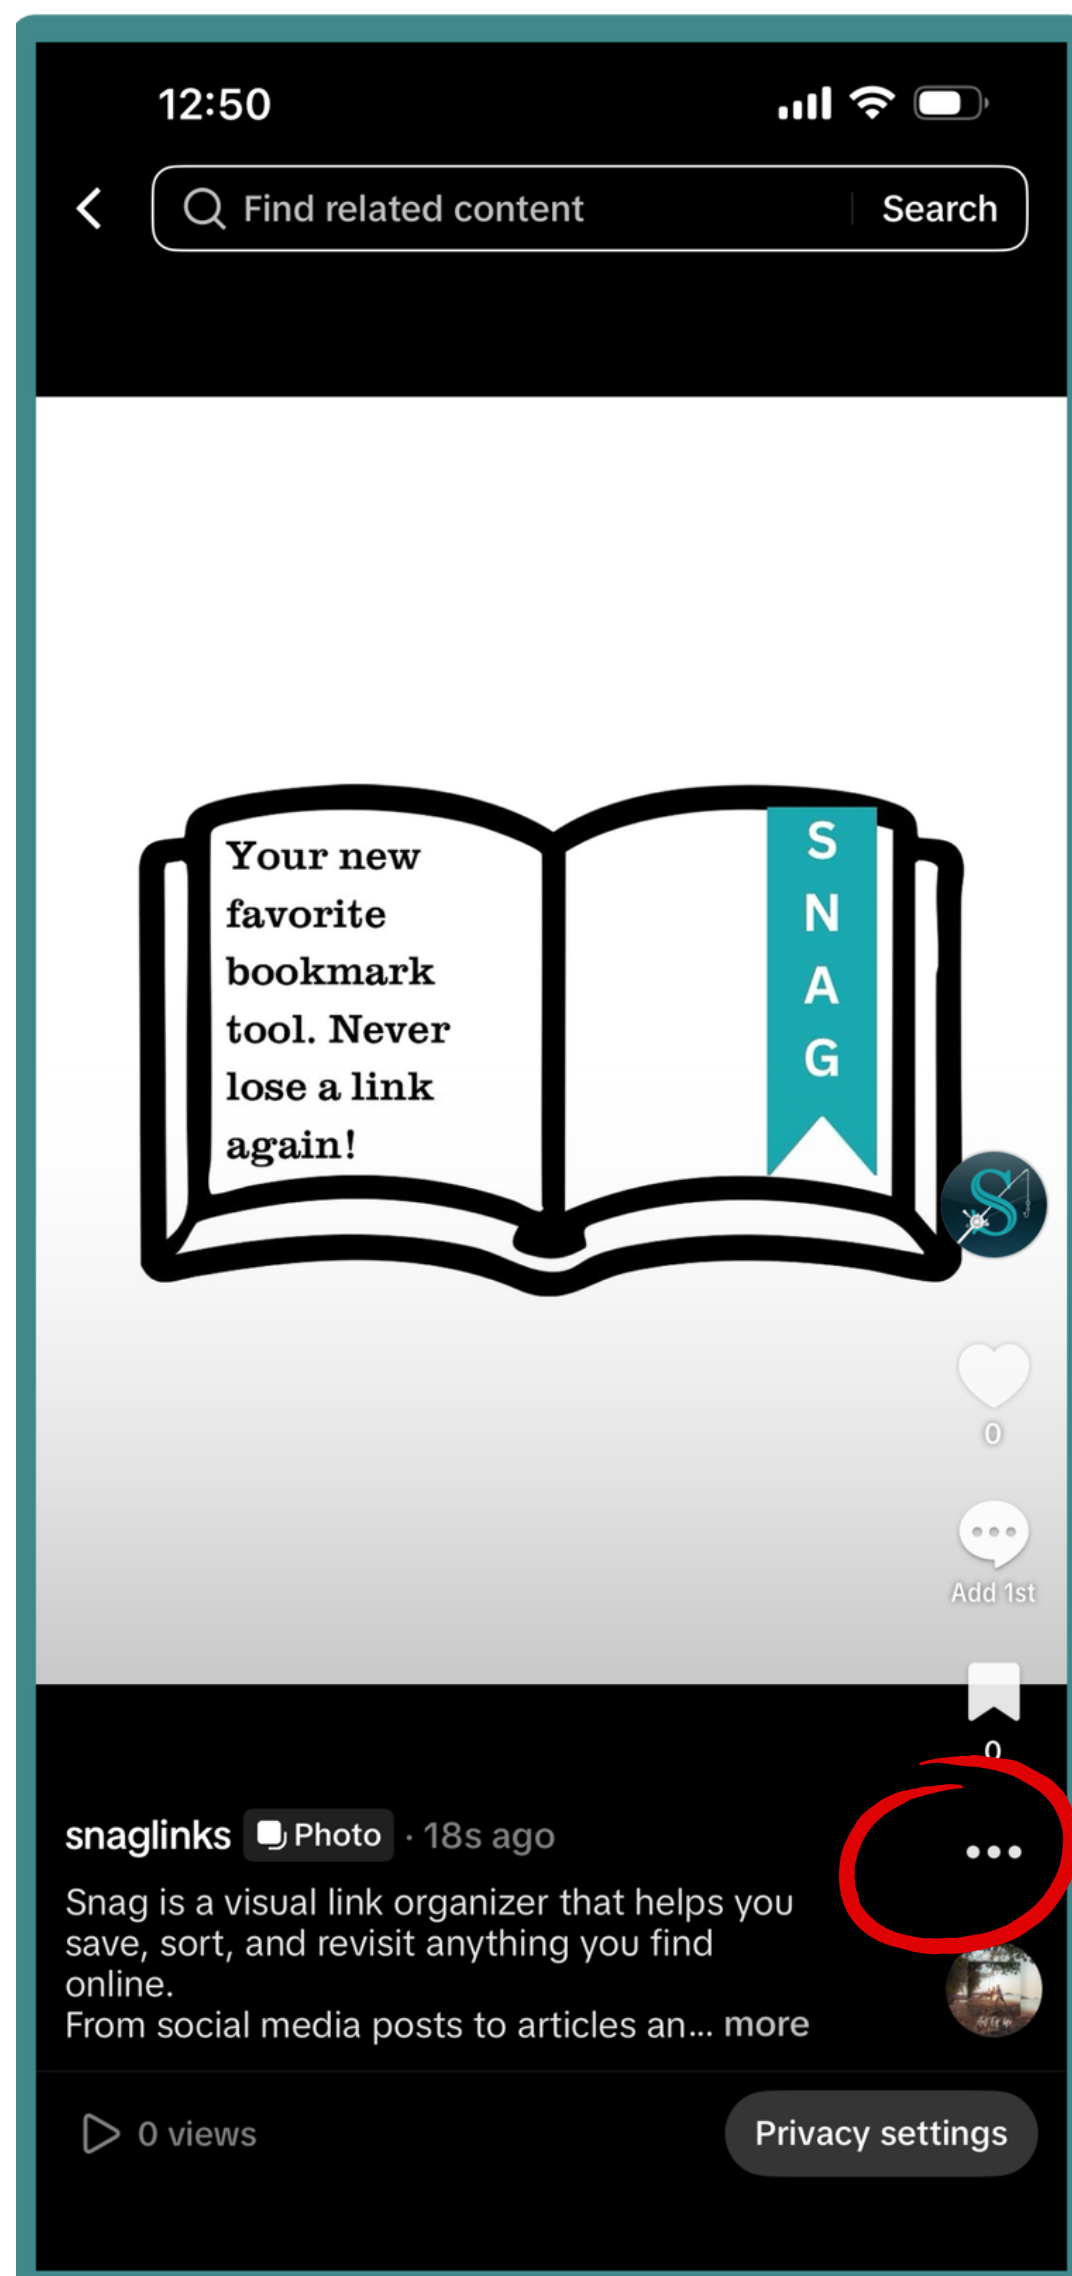

Step 2: Find something you want to save? Hit the Share button to begin saving the link to Snag.

Web

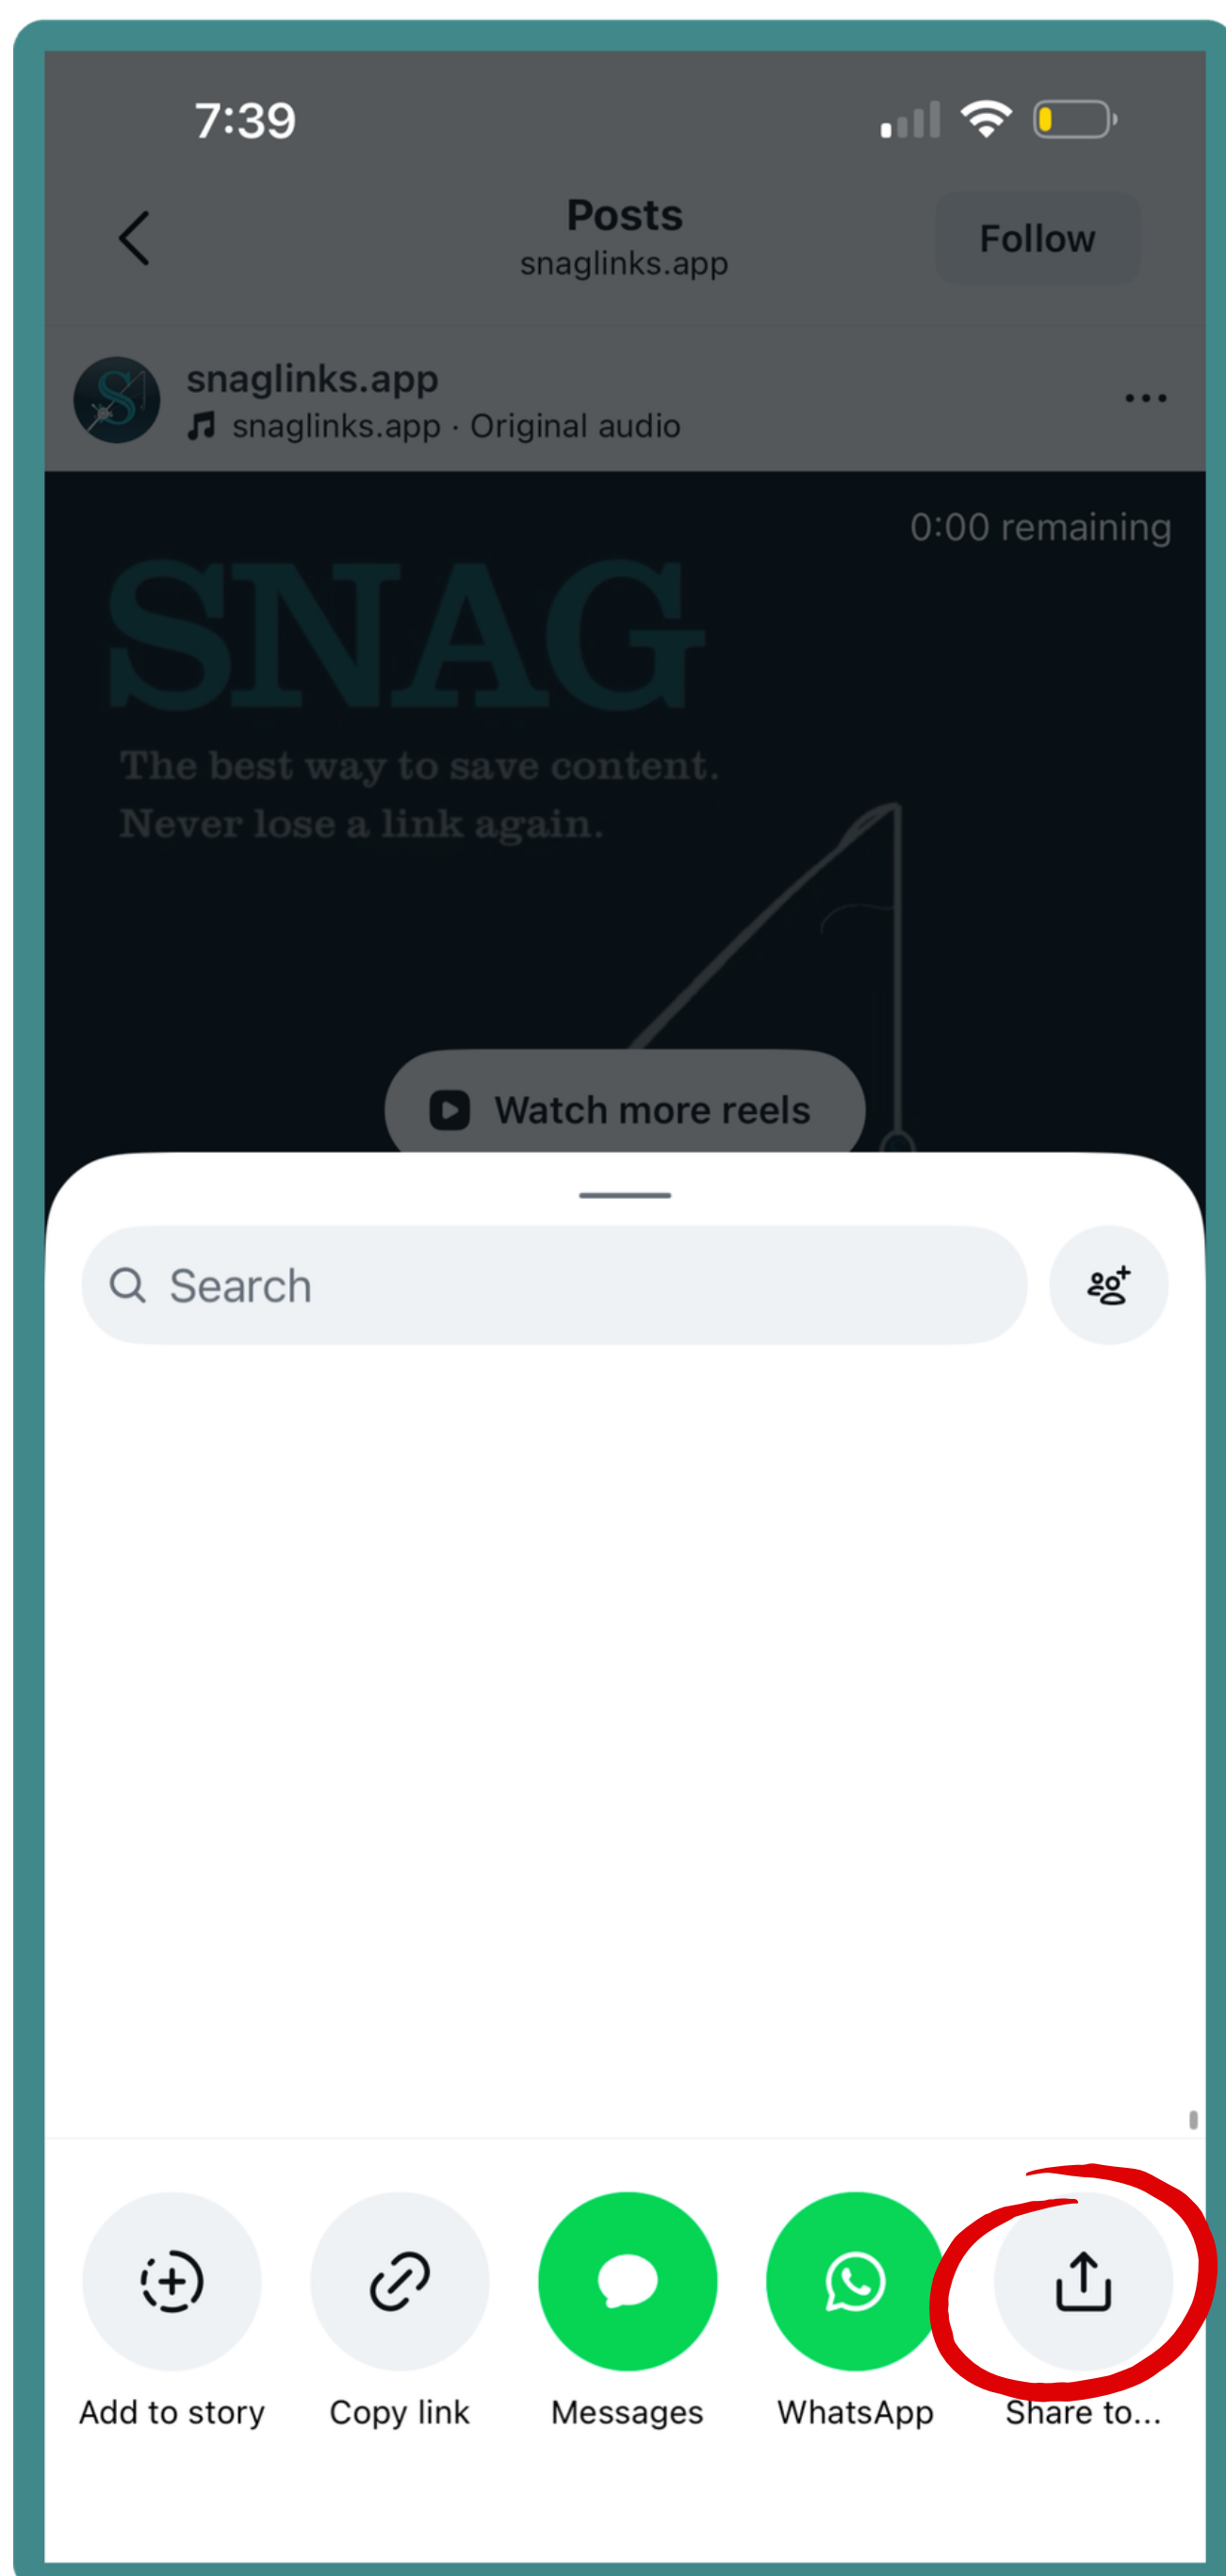

Step 3: Instagram- hit the **Share to** button in your share sheet.

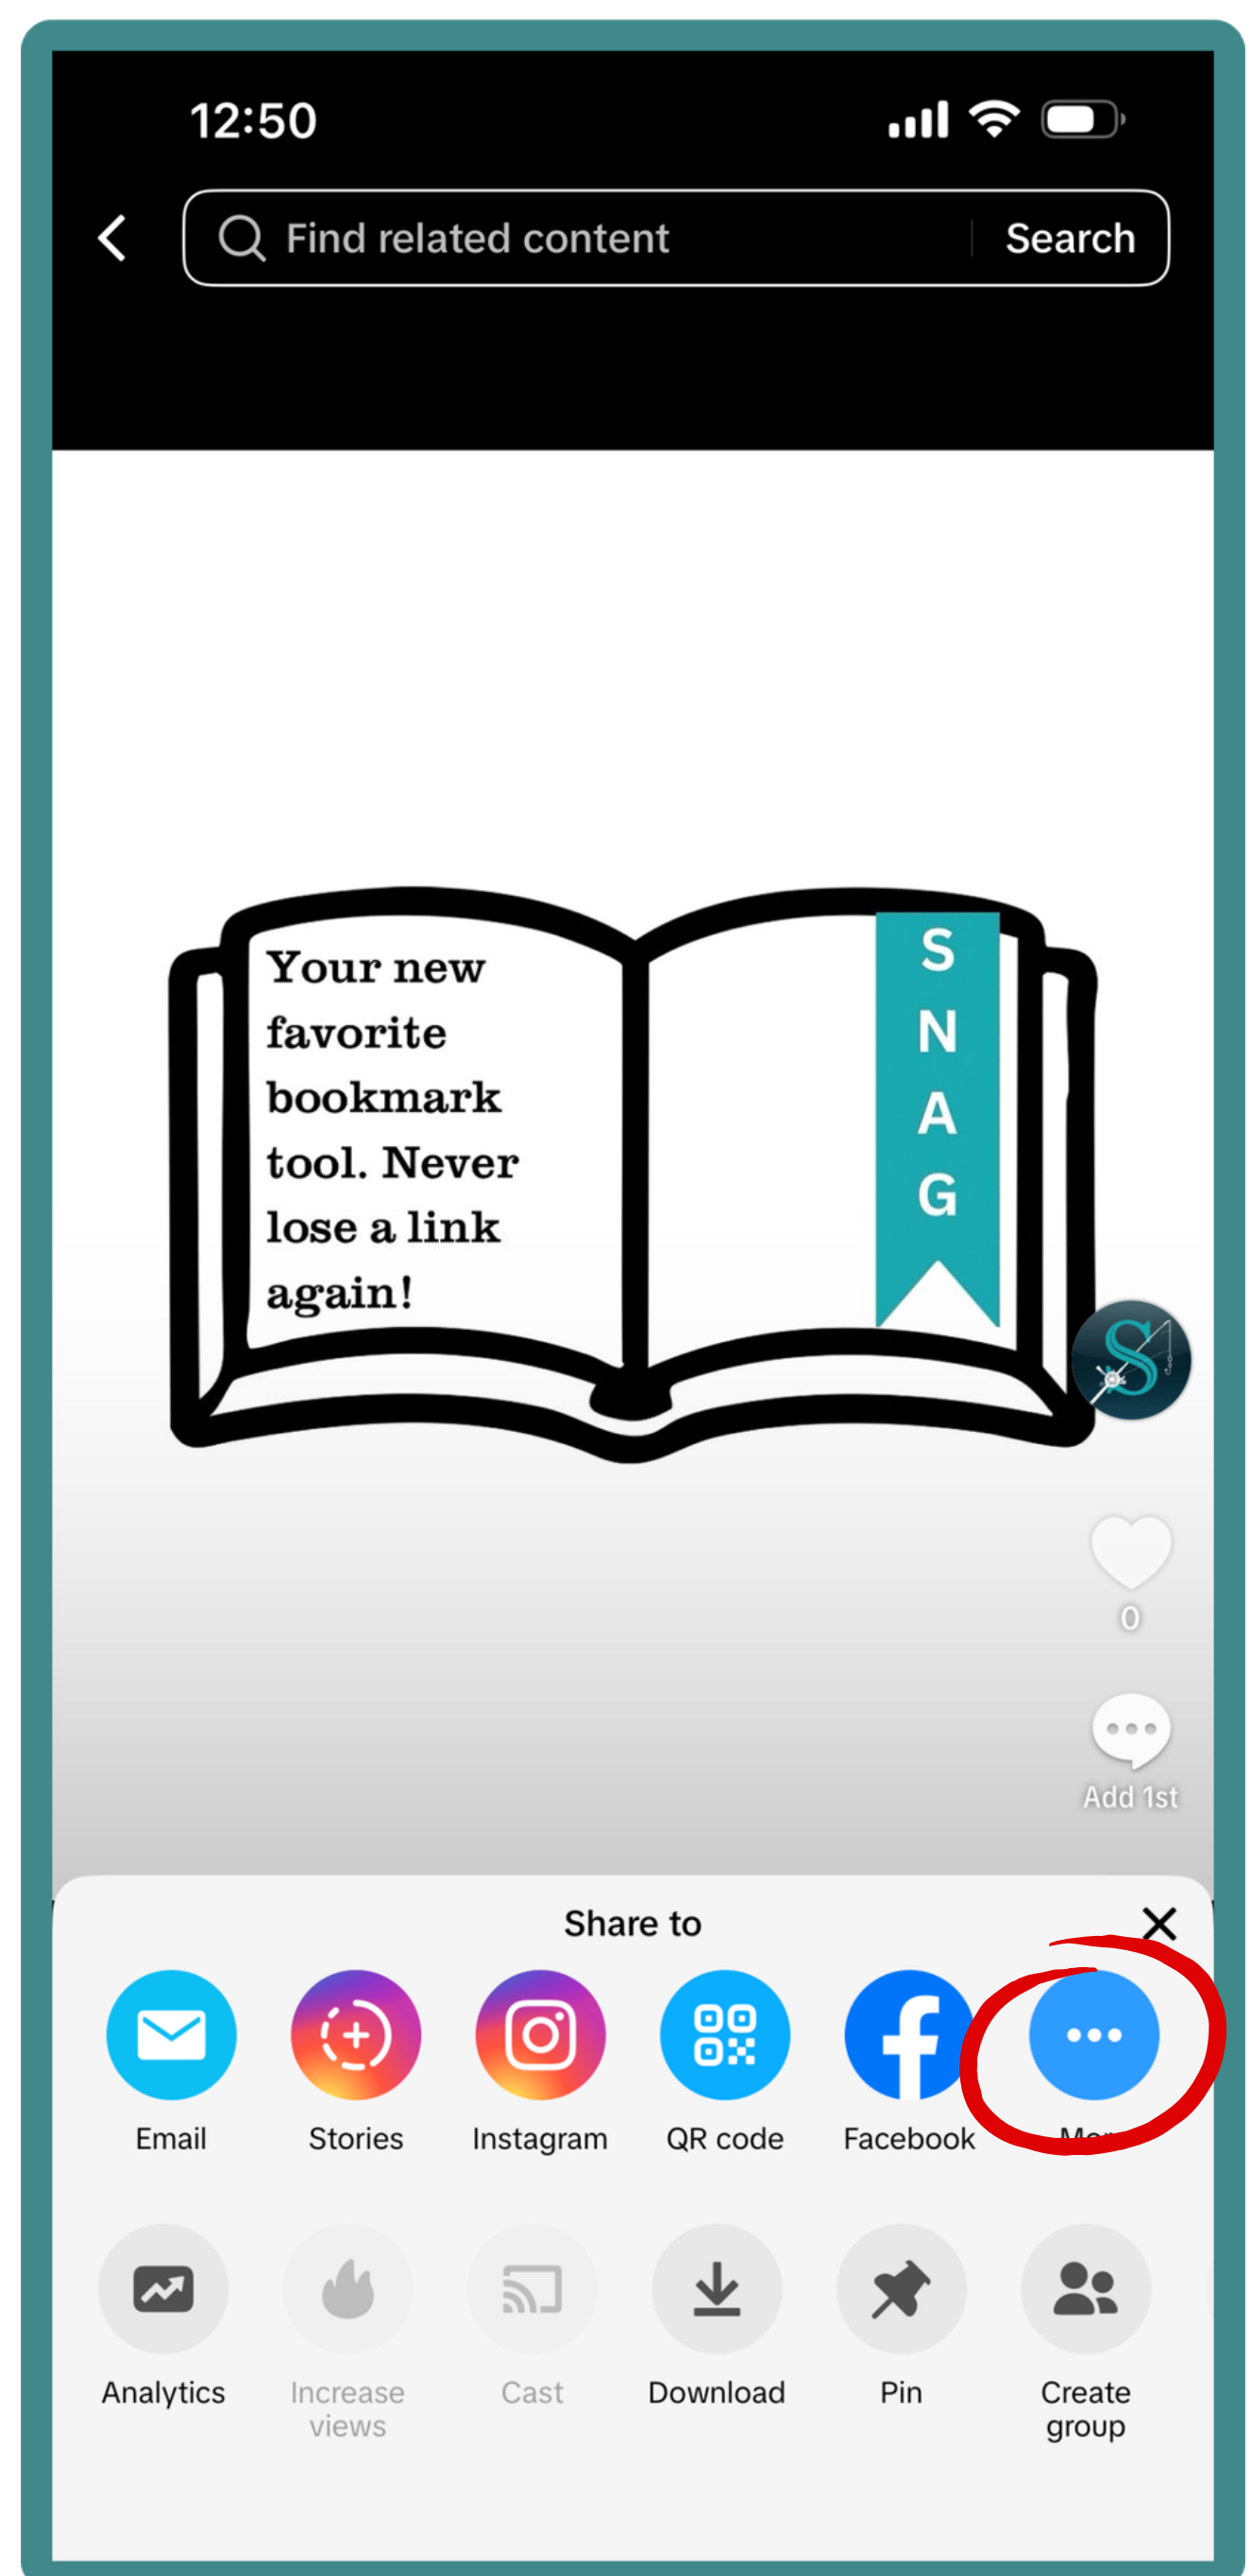

Step 3: TikTok- Scroll left to the More button (the icon with three dots).

Step 3: The Web- skip to step 4

Instagram

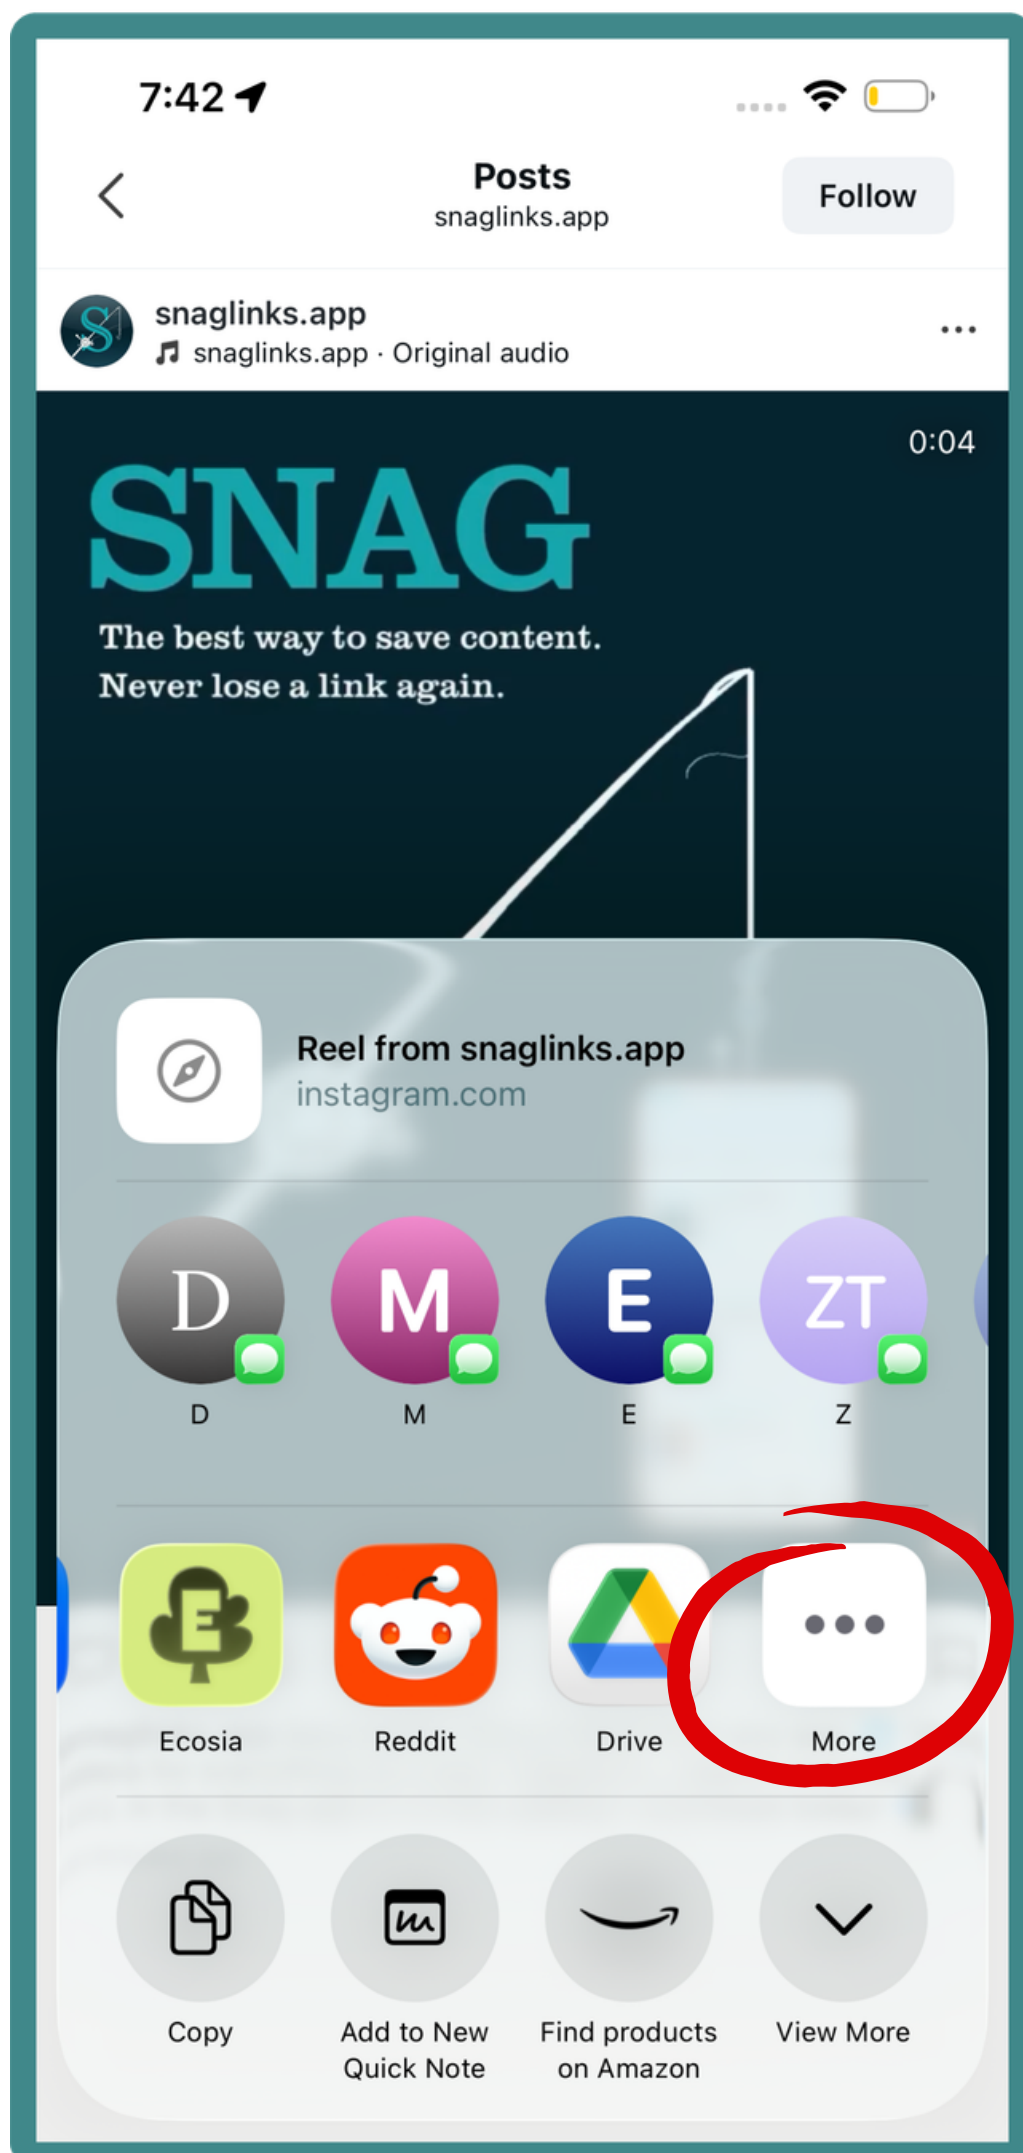

TikTok

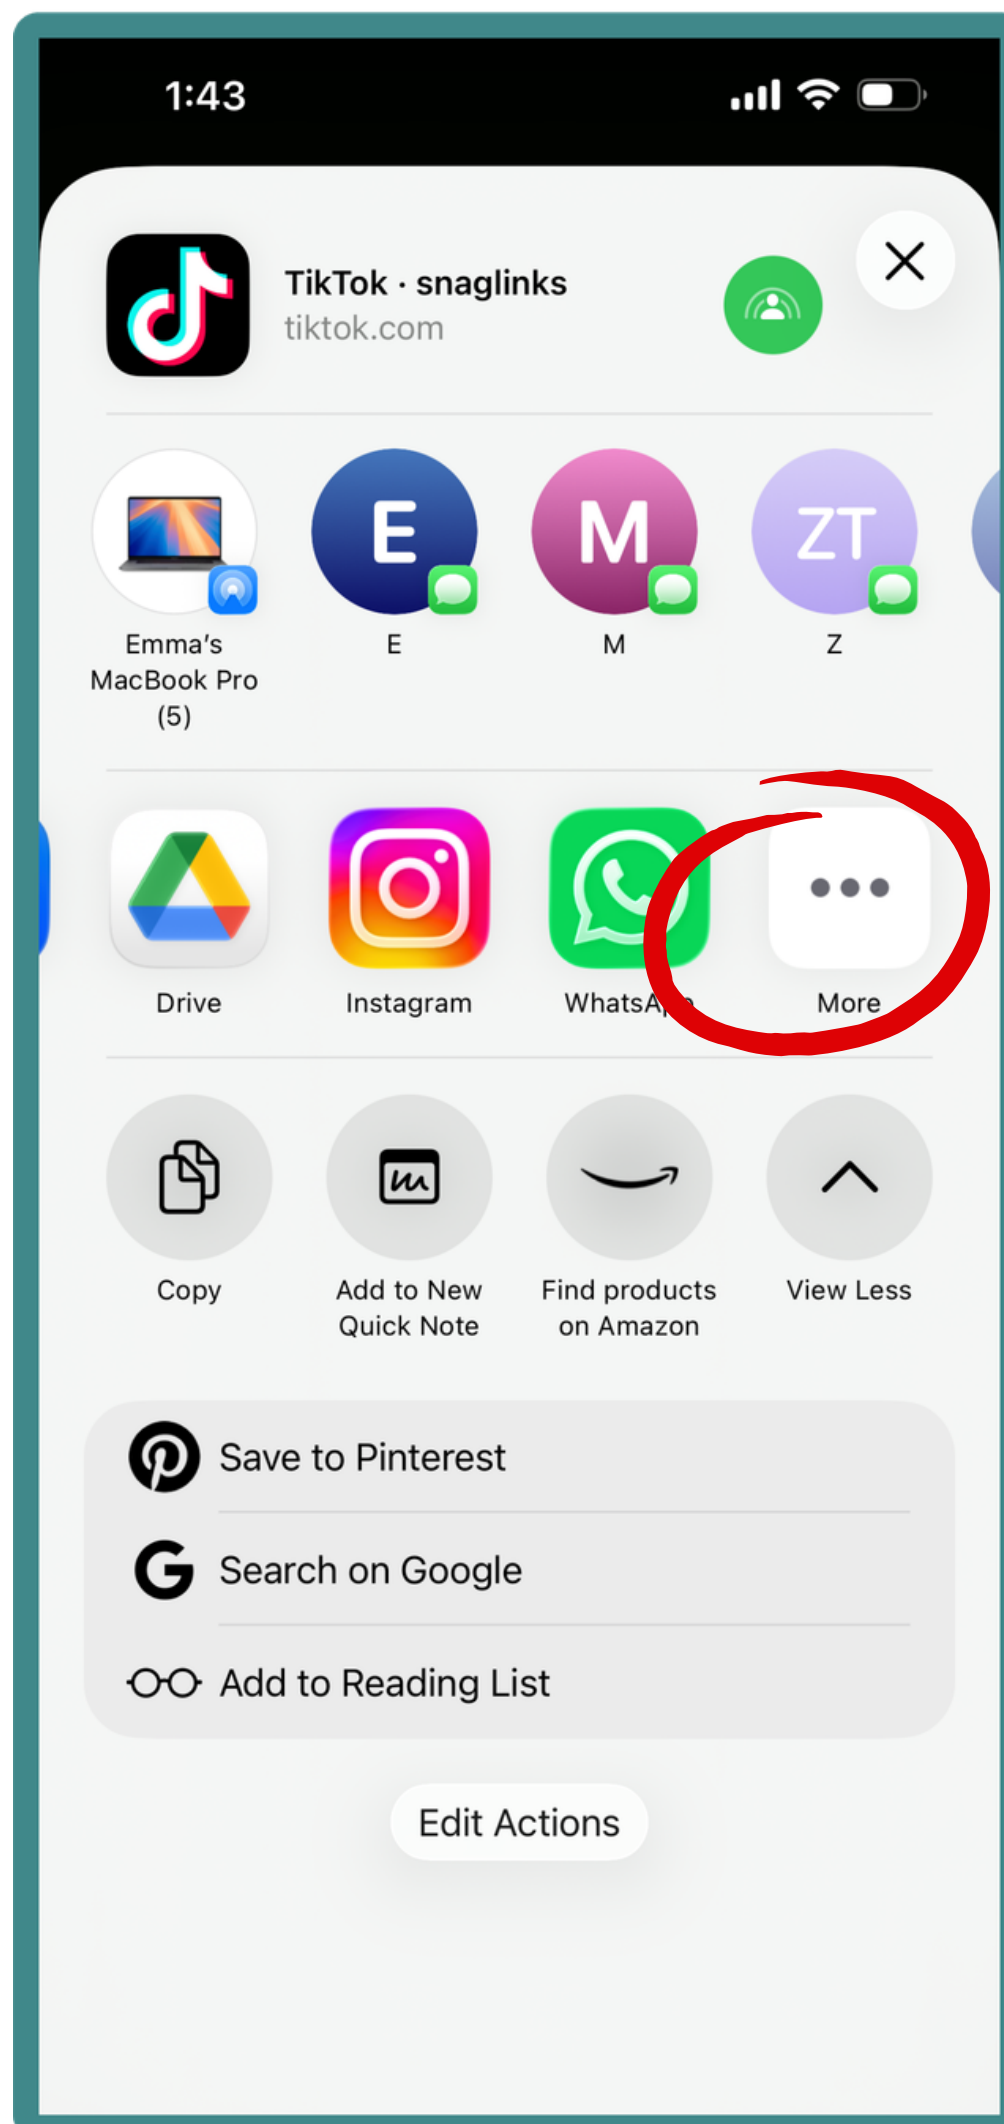

Step 4: Once on your share sheet, you may need to scroll to the left to More (the icon with three dots) since you just downloaded Snag.

Step 5: Press edit in the top right corner.

Step 6: Scroll until you find Snag and press the (+) button and toggle the app on. Snag will now appear in the favorites section.

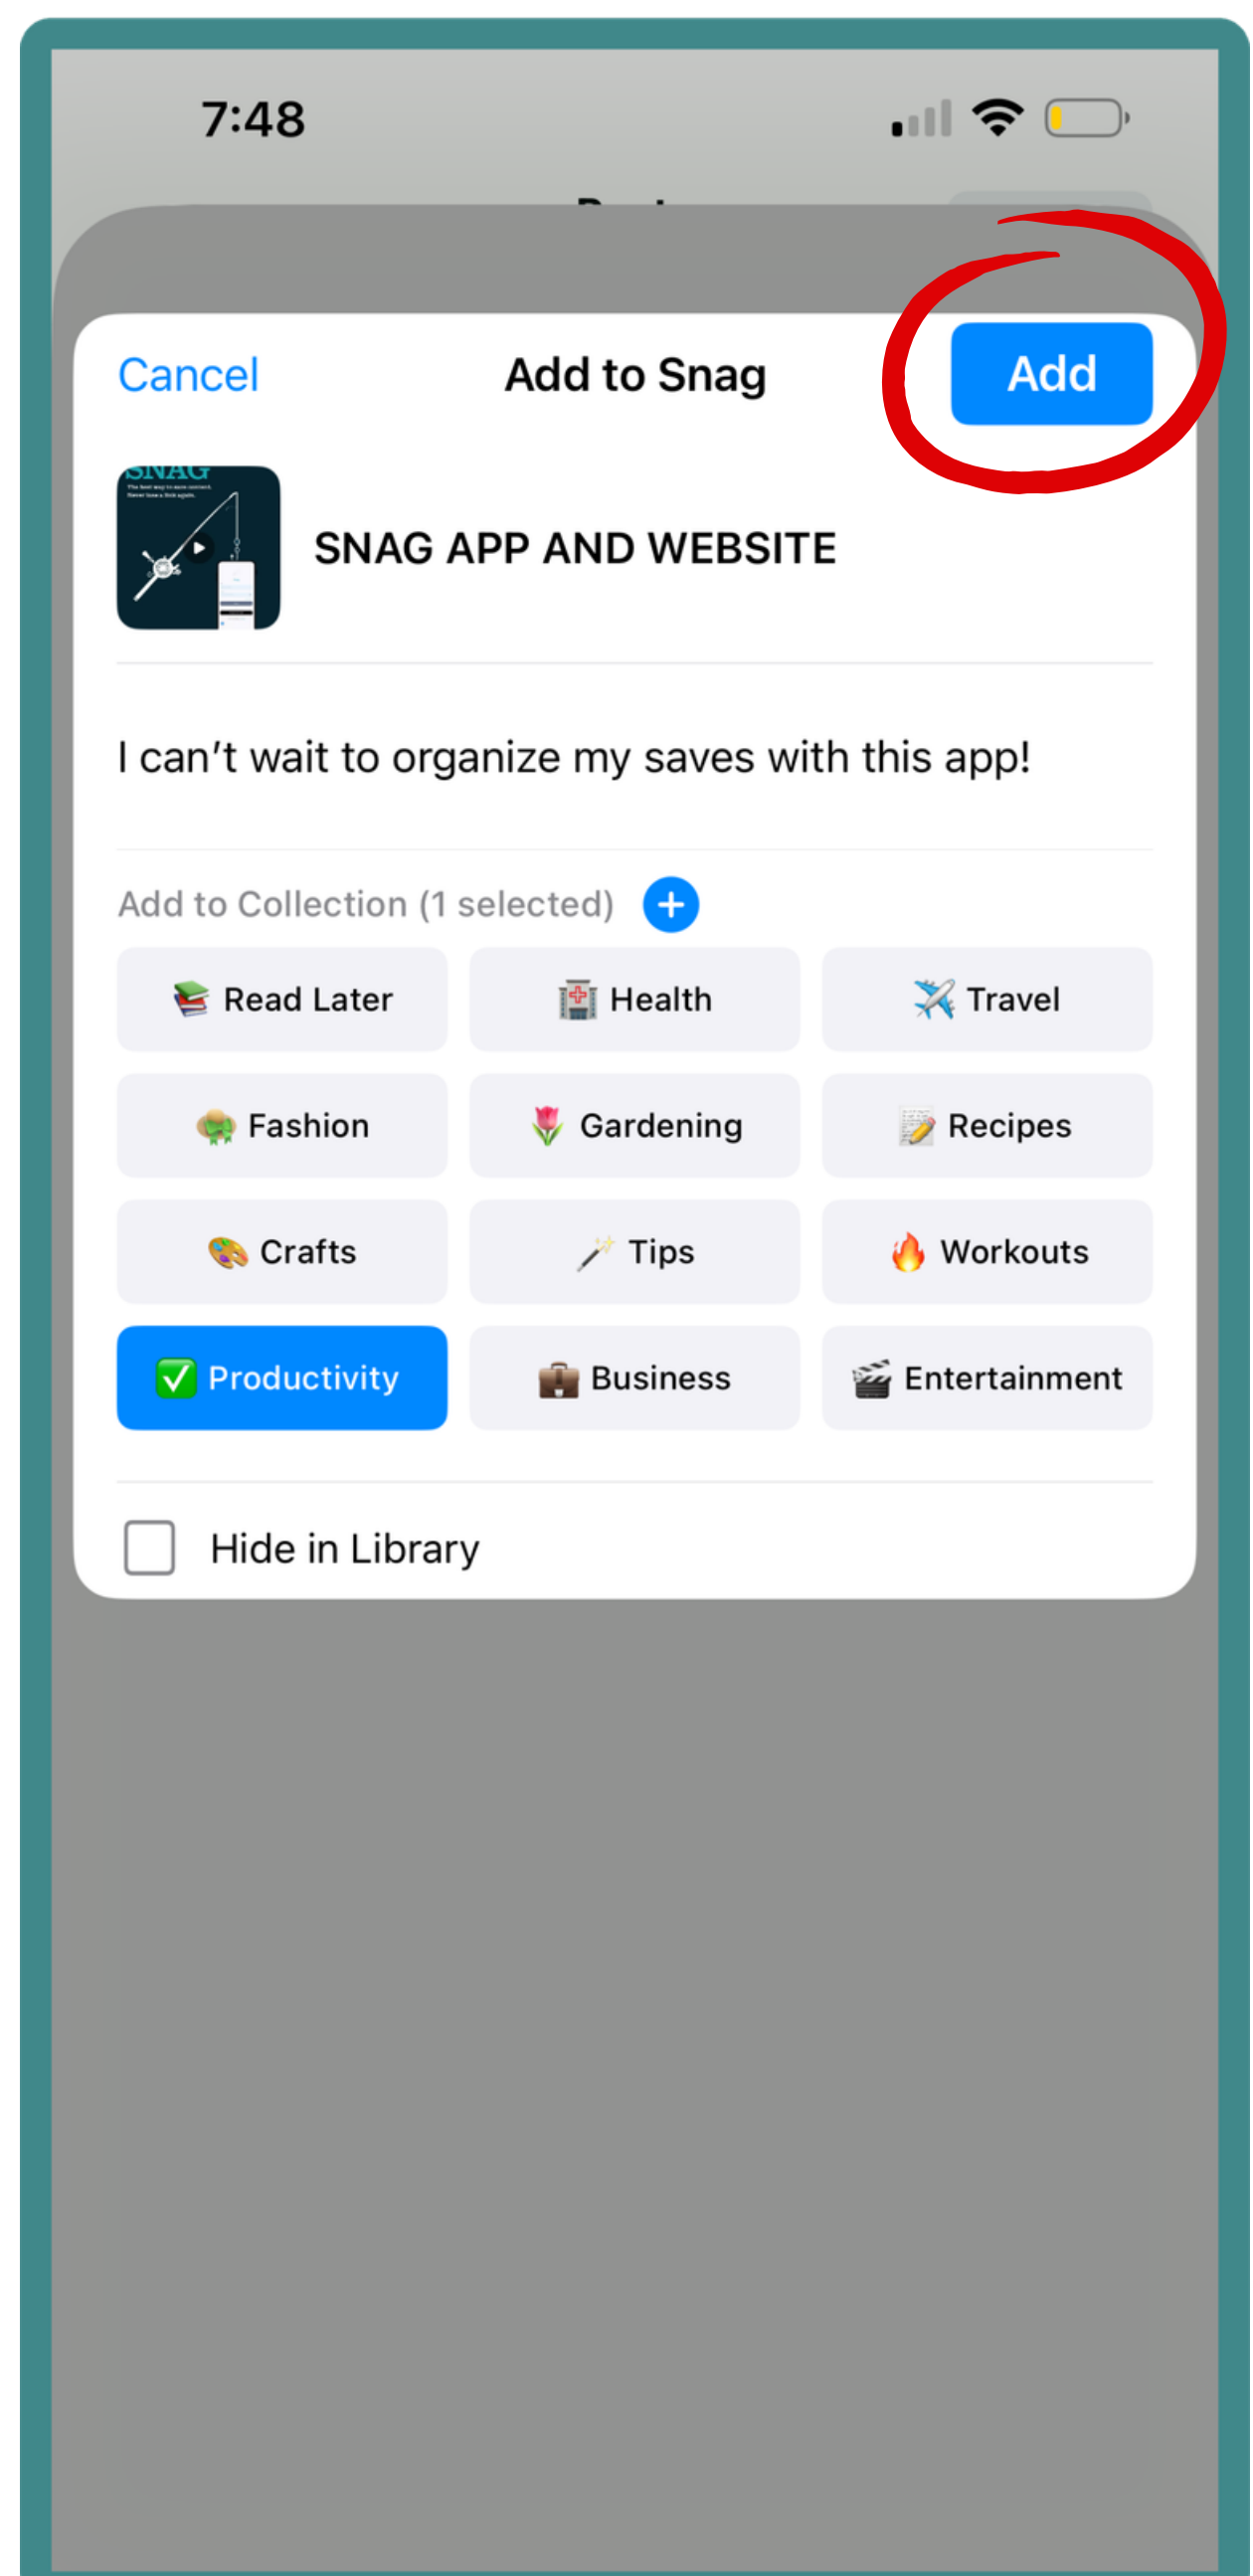

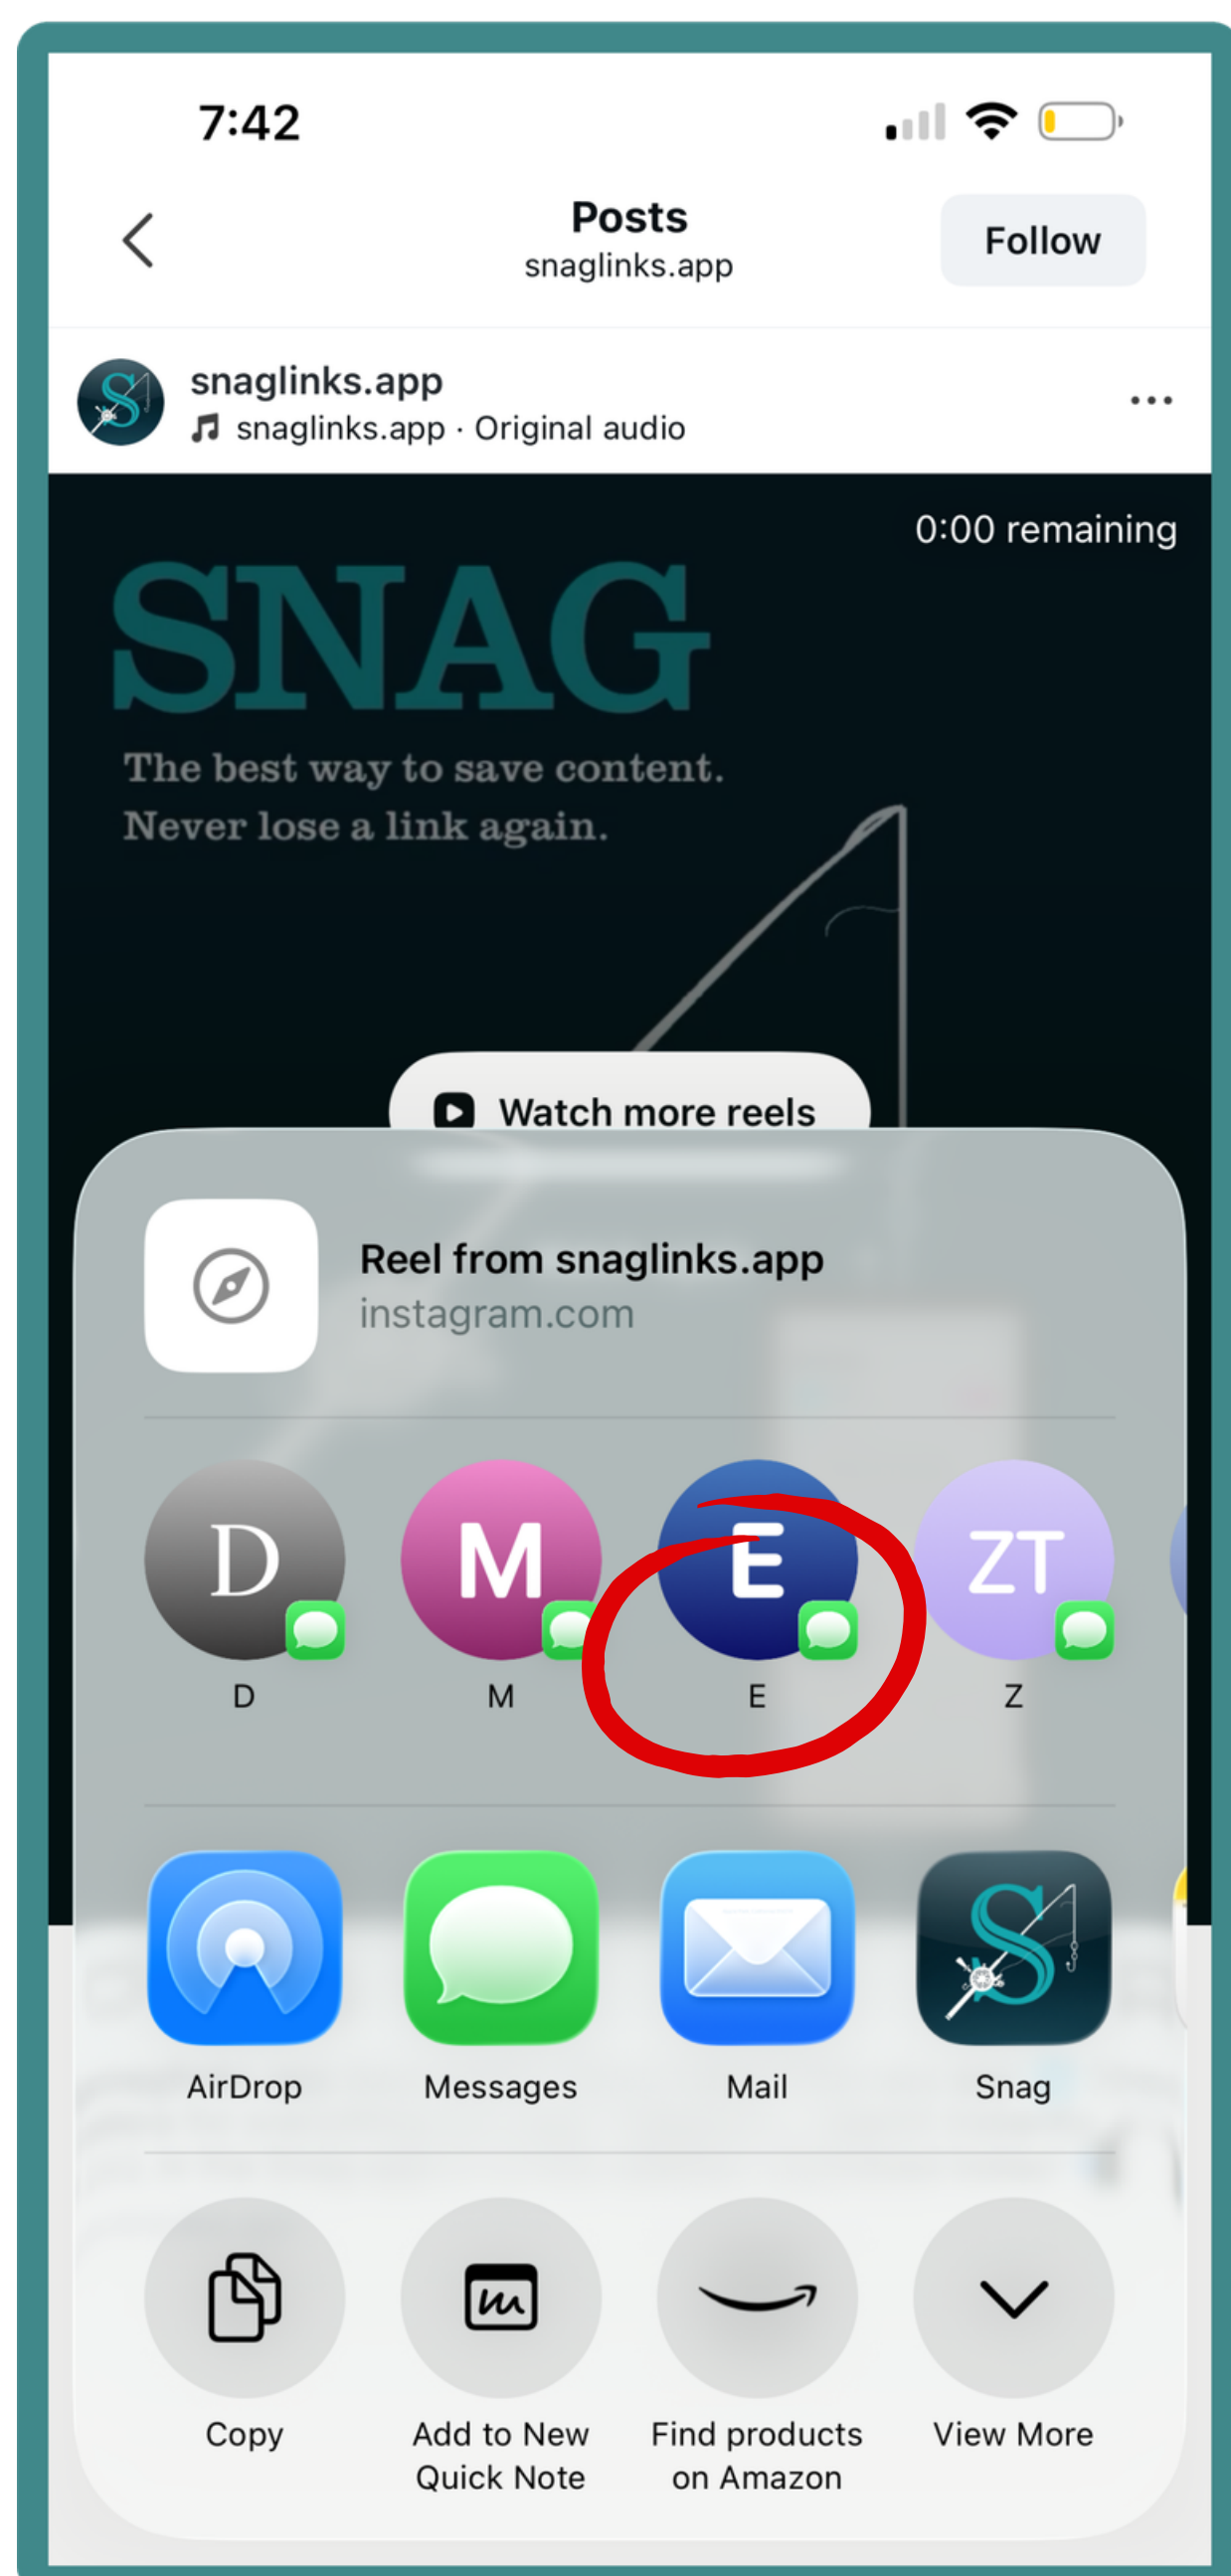

Step 7: Press the check mark and return to the share sheet. Snag will now be a top suggestion in your share sheet.

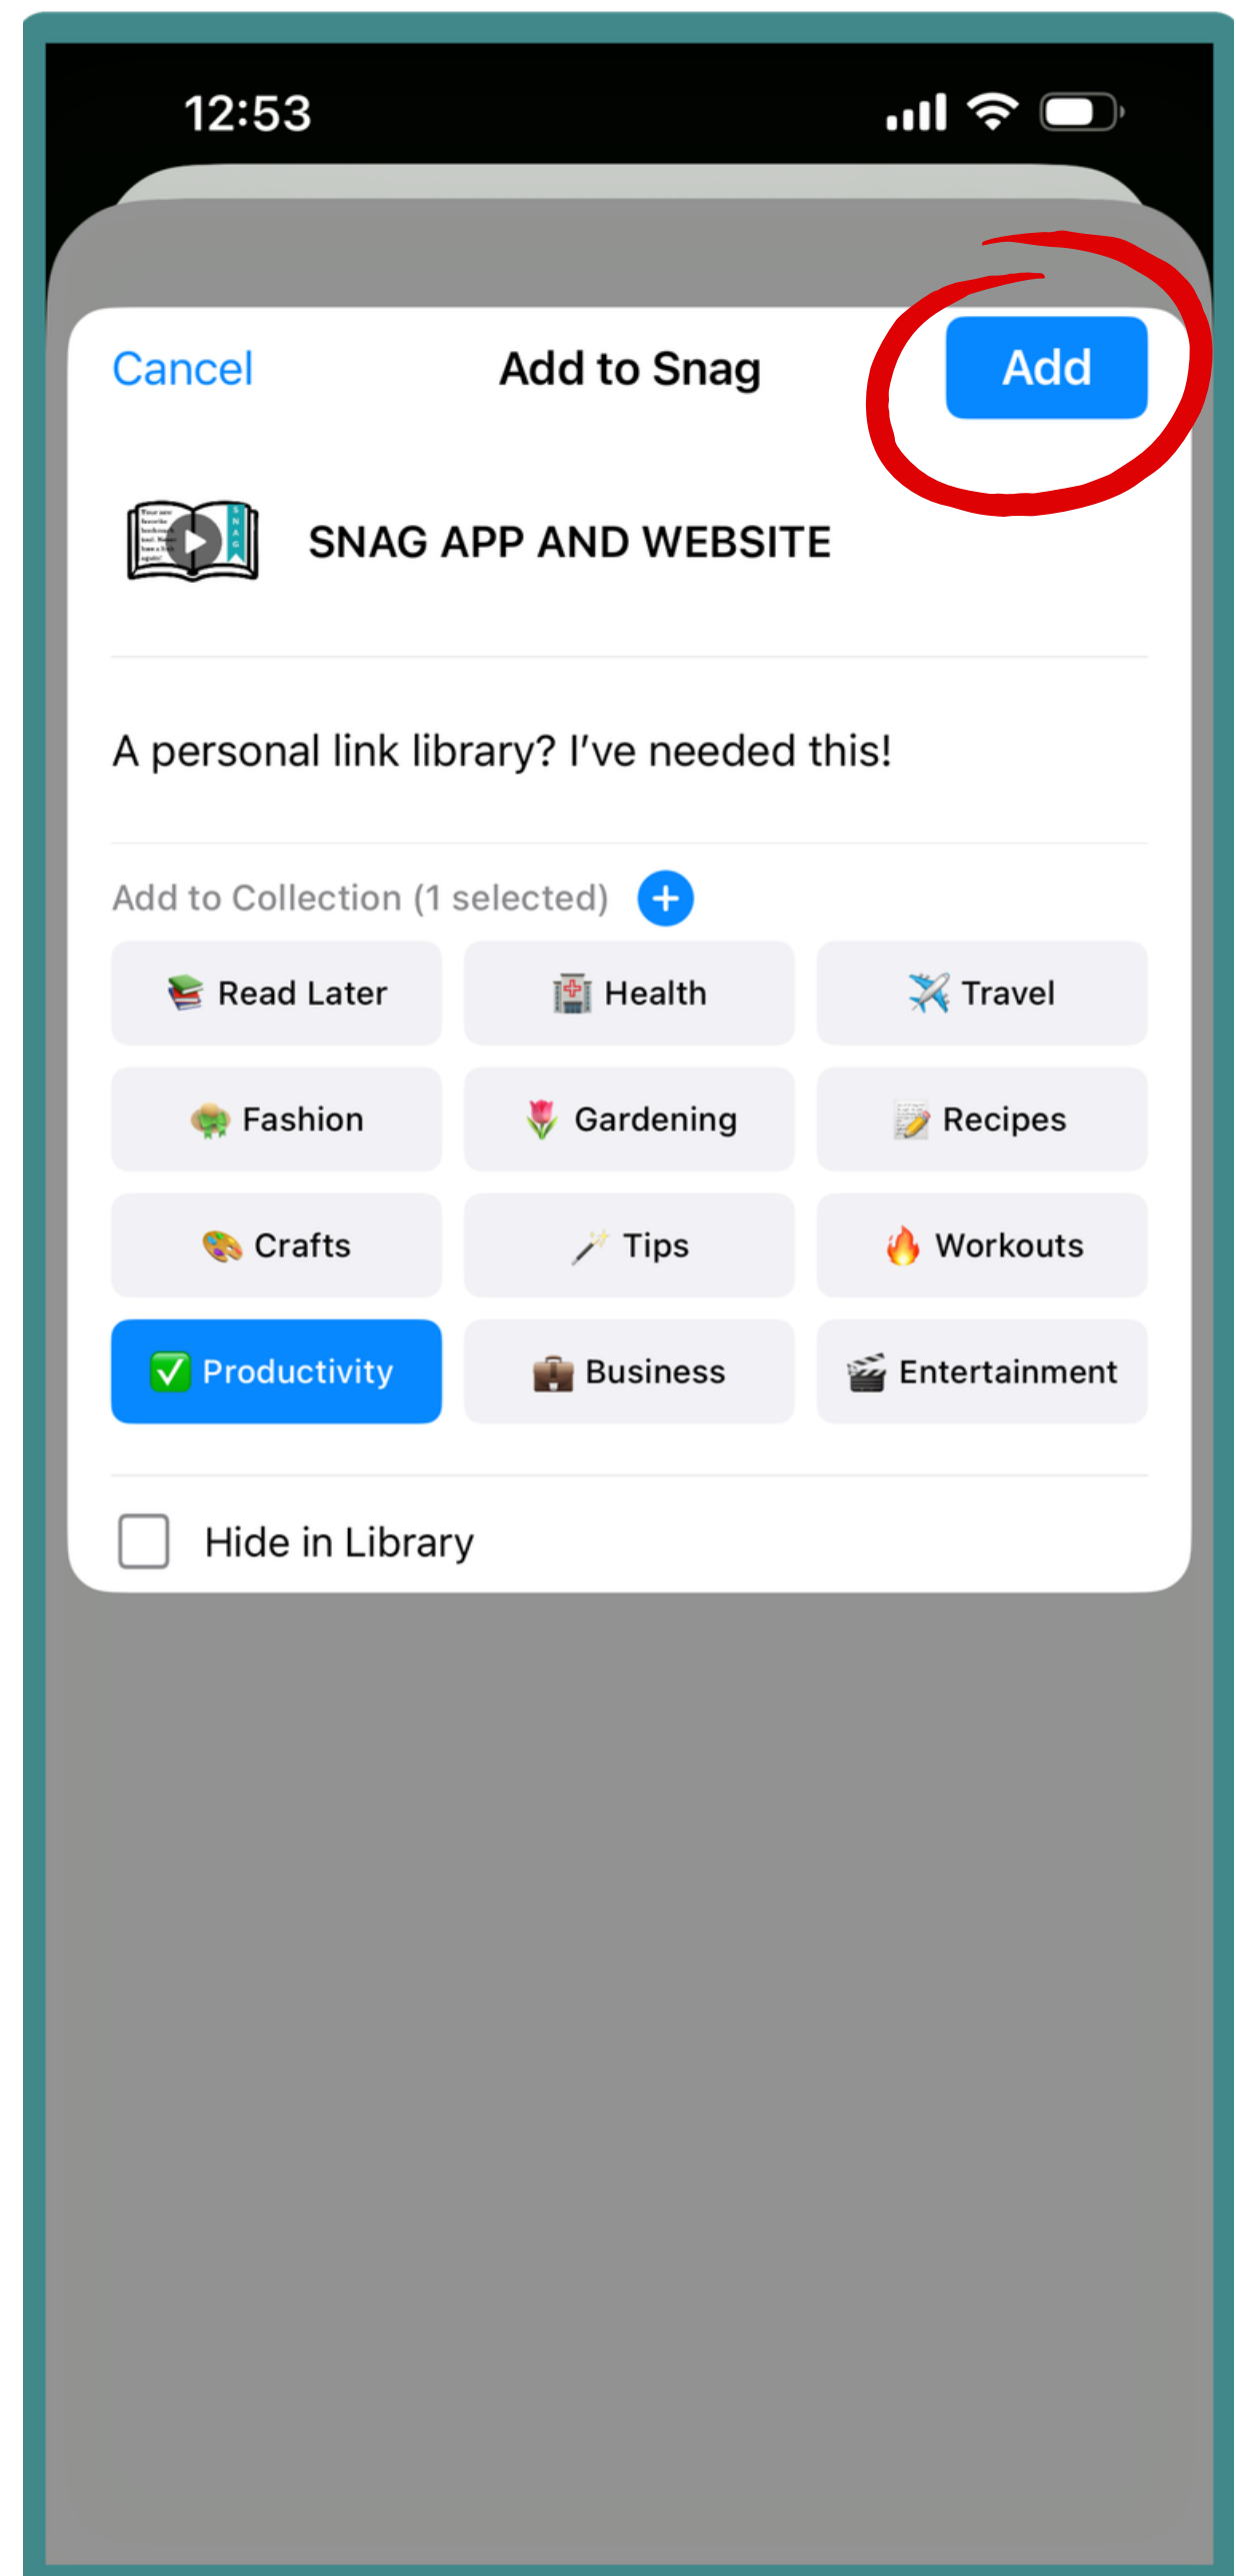

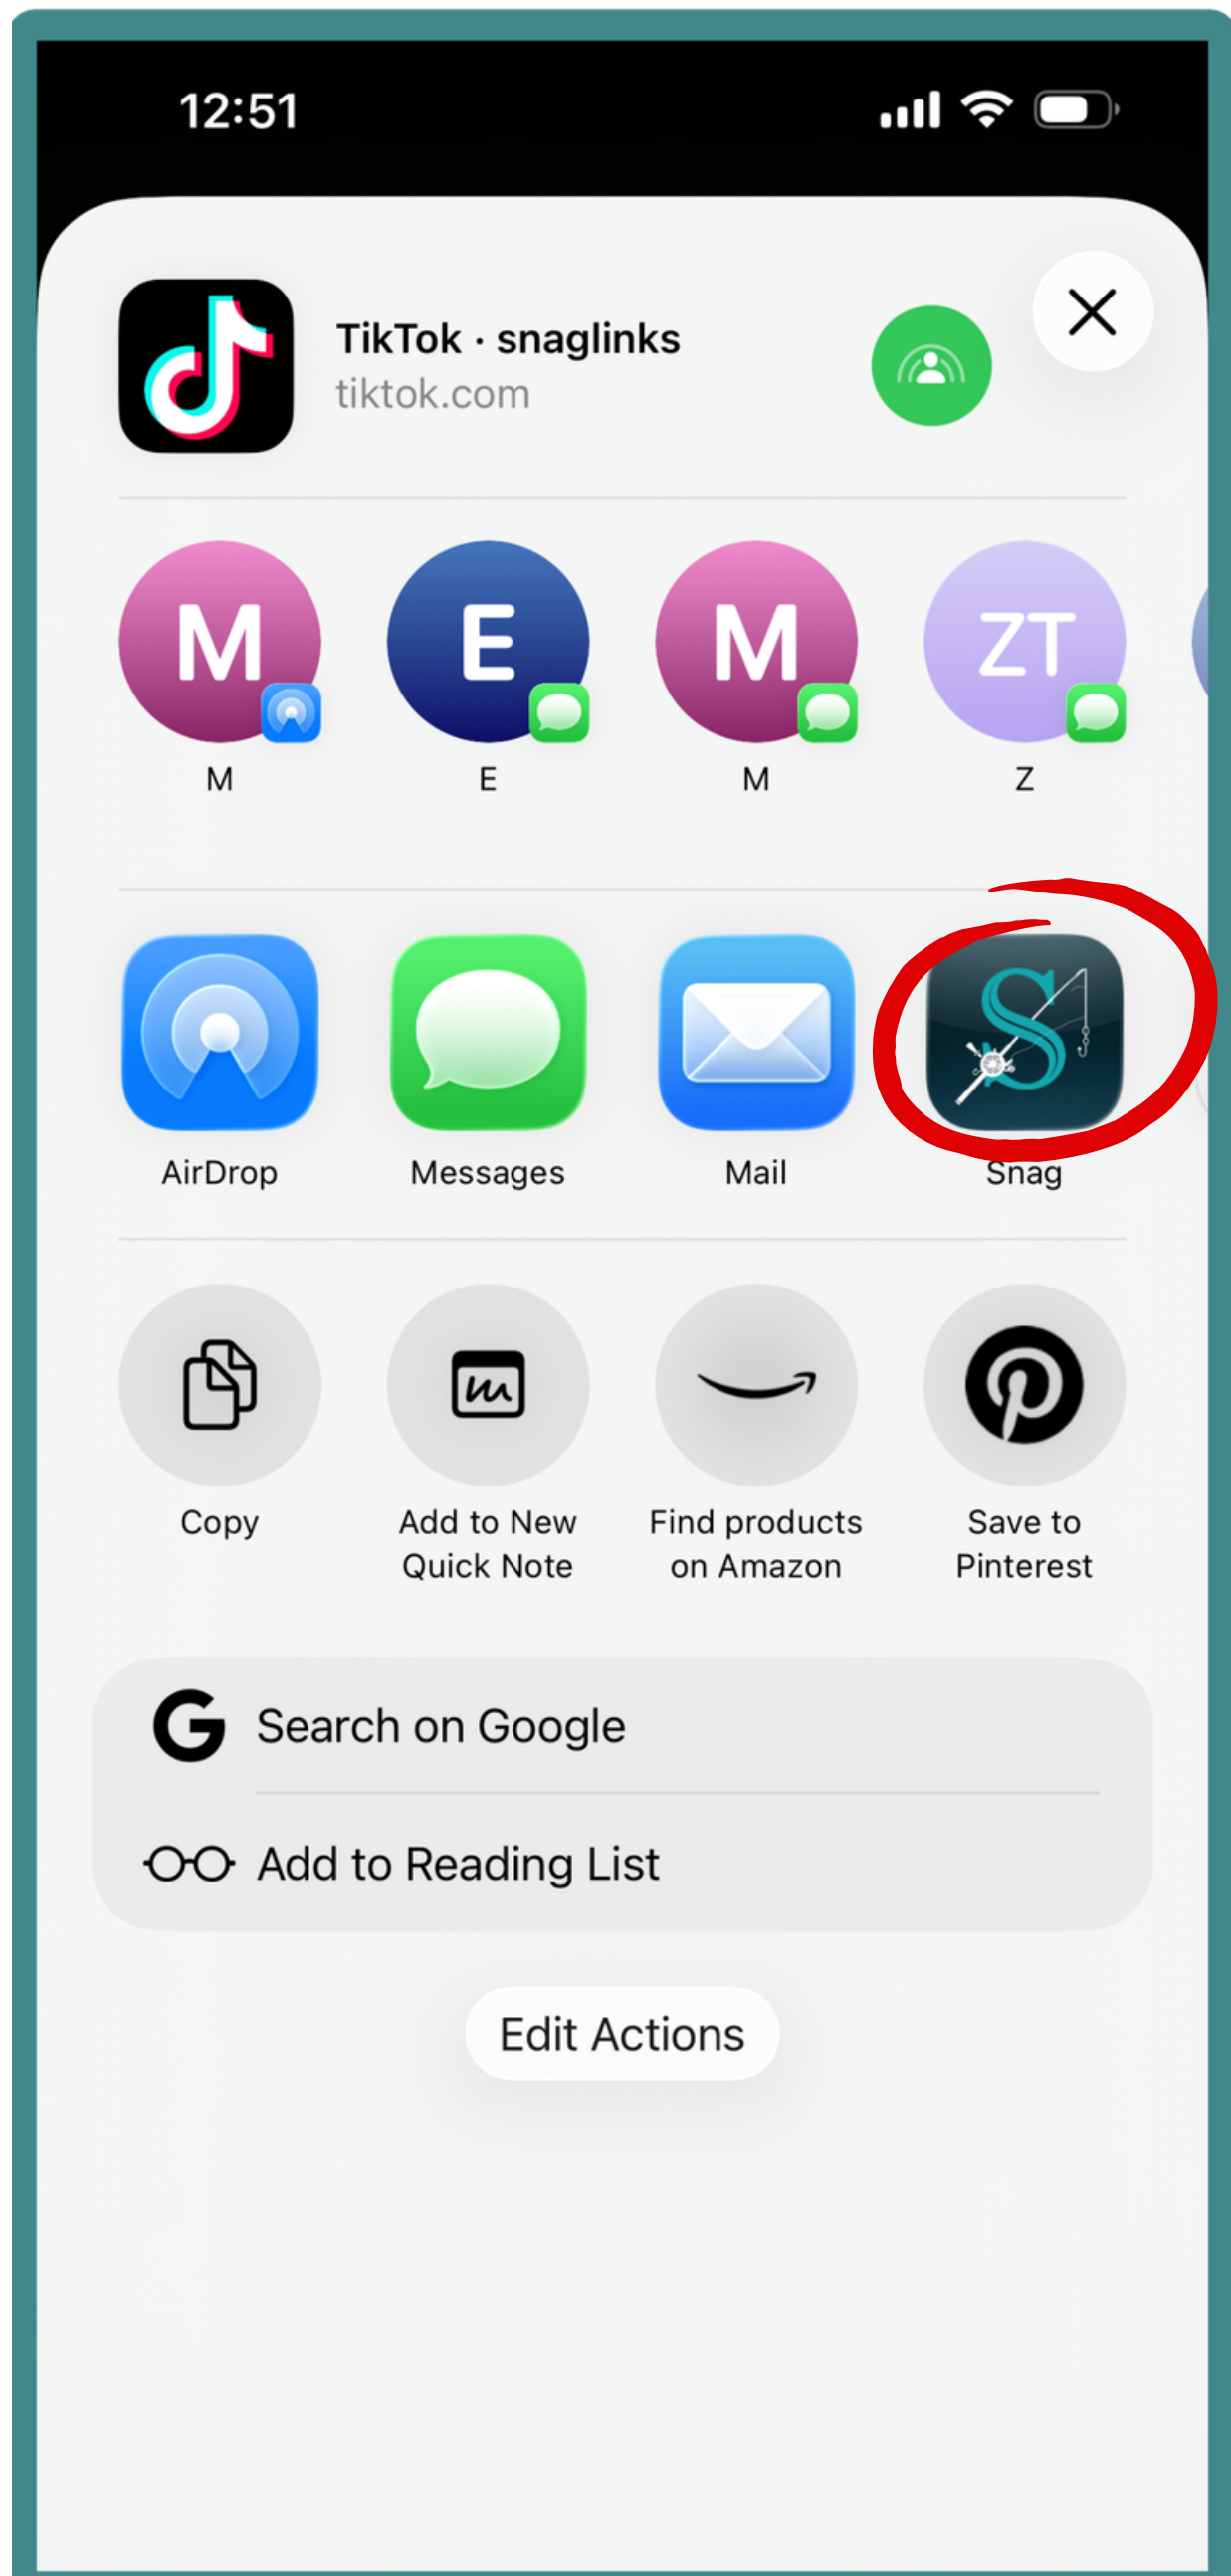

Step 8: To finish saving your link, hit the Snag app icon. Create a title, add a note, create a collection, or add to a previously created collection. Collections can be made when you are saving a Snag or directly in the app.

Step 9: Your Snag will now appear in your library and the saved collection. The Snag will also be categorized by the platform it was saved on.

Step 10: Repeat steps 1,2,3,8, and 9 as needed to save the links to content, products, and more on any social media platform or website. **Happy Snagging!**
